

Washing and care instructions for spirella Bathroom rugs

Please follow the special care instructions on the sewn-in care labels for all spirella articles.

Care

This spirella bath rug made of quality fibres is machine-washable and tumble-dryable, it can also be used on underfloor heating.

When used on synthetic floors: ask for the recommendation of the floor supplier.

Choose a delicate cycle with a mild detergent and normal spin cycle. Wash rugs separately (if there are sets of several pieces, wash them together so they do not wash out unevenly). Do not wring by hand and do not dry on the radiator – if it is tumble-dried, choose a low temperature. For a beautiful, even pile: shake the rug vigorously.

Attention with cotton rugs:

The initial occurrence of fluff will gradually reduce to a minimum. Recommendation: Choose the highest possible water level and use a laundry net. Clean fluff filter and drum.
